

## Application Software Product Manager

Port Authority is seeking a Application Software Product Manager to oversee application software lifecycle and allocation, including requirements definition, purchase coordination, licensing management (both vendor and internal customer), quality assurance, and contract renewals. Systems include extranet, intranet, mobile applications, administrative, collaborative and communications applications.

### Essential Functions:

- Responsible for overseeing software application lifecycle. This includes doing needs analysis with internal customers, defining purchase requirements (or coordinating same for internal development), coordinating purchasing documentation, managing licensing and contract renewals, and ensuring quality assurance testing is completed on both internal and purchased software. Active and hands on involvement in the entire lifecycle of the applications management process in a team environment.
- Allocate, track, and ensure that software licensing is granted as needed to internal customers and is within contract terms.
- Leads projects to achieve roadmap goals: interfaces, coordinates efforts with consultants, vendors and internal personnel to assist in successful project completion.

### Job requirements include:

- BS in Computer Science or related field from an accredited school. Related experience may be substituted for education on a year-for-year basis.
- Two years of quality assurance & testing plan development and execution
- Three years of software license management experience
- Prior system architecture design experience.
- Experience with modern Windows desktop and server environments.

### Preferred attributes:

- Experience with Microsoft Enterprise, Oracle or Adobe VIP/LGA or similar licensing programs and management systems.
  - Strong organizational skills, including attention to detail.
  - Strong communication skills in written and verbal modes.
- Experience with Microsoft collaborative and communications technologies, such as SharePoint, Teams, M365 and O365 components.

We offer a comprehensive compensation and benefits package. Interested candidates should forward a cover letter (*with salary requirements*) and resume to:
